Subject: RE: DHS Port Security Grants

The State Rail Plan developed by Wilbur Smith for the Department of Commerce Public Railways Division identifies 2 sites on the Naval Base for NS and indicates an expansion of Cooper Yard and the Maccalloy property for the CSX yard. We were thinking Public Railways, DOC, should apply for the funds so as to not cause the Port any permit headaches and raise questions about MOU/A violations for the Port with the City of North Charleston because the NS rail access to its yard on the base would be through the northern end per the State Rail Plan study.
